A Personal Word

from

C. H. Perkins

We're very proud of our fall catalog and want you to be sure to see all of the exceptionally fine roses we are offering for the first time. These plants were selected from thousands of experimental varieties, after years of testing and observation, to take their place among the finest selection of roses ever offered. **GOLDEN SCEPTER** the unfading true golden-yellow Hybrid Tea rose that you have been waiting so long for. A sparkling golden-yellow rose with deep colored, long charming buds and large brilliant, graceful blooms of artistic high-centered form. Reports from our test gardens in even the most difficult sections have raved about the ability of this plant to retain its golden-yellow bloom despite intense sunshine.

VOLCANO, on page 2 of the new catalog, is a variety that the admirers of red roses will welcome. An exceedingly large new Hybrid Tea with unusually long, slow opening, deep carmine buds. The buds expand slowly to immense lovely glowing cherry-red blooms, 6-7 inches in width. At the finish the blooms assume a rosy-pink color. In our regular nationwide testing program we have found this rose to be uniformly satisfactory in all sections.

OPERA, on page 3, is distinctive in its color combinations and very different in its gay form of bloom. The long slender buds, borne on long stems, are almost bicolor in the intensive suffusion of golden-yellow at the base, to a scarlet at the top of the bud. As the flower opens to a full 6 inch bloom, the petals quill slightly and the color becomes a gay flaming, light scarlet-red with a buff-yellow on the reverse of the petals. The general effect is airy and bright, capturing attention and admiration, wherever the plant is grown or shown. When first shown in competition, Opera won the Gold Medal for the most beautiful rose of France, also Gold Medals at National Rose Society, London; Geneva, Switzerland, and Bagatelle, France.

Many years of research has finally enabled us to give you a white Floribunda worthy of taking its place in Rosedom's Royal Family. **White Pinocchio**, on pages 9 and 16 of the catalog, a glistening white seedling of Pinocchio which distinctly deserves to be "The White" of the Pinocchio family. Several years ago we gave you Pinocchio, which has been one of the most popular Floribundas in the world ever since its introduction. Red Pinocchio, Lavender Pinocchio and

Yellow Pinocchio followed, all received the same spontaneous approval of the original Pinocchio. We are sure the same stamp of approval will be given to White Pinocchio.

Be sure to note the sensational Floribunda **Fashion**, on page 4 of the catalog. When we introduced this rose a year ago it had already won three of the most important Rose honors in the ENTIRE WORLD; top All-America Winner for 1950, only winner of a Gold Medal at the 1948 British National Rose Society Summer Show, Gold Medal winner of the 1949 Trials at the famous Bagatelle Gardens in Paris. Since its introduction then two more important honors have been bestowed on Fashion, making it the only rose to win 5 important International awards. Fashion was awarded a Certificate of Merit at the International Rose Trials held in Geneva, Switzerland, and was a Gold Medal winner at the International Rose Test Gardens, Portland, Oregon.

I urge you to look at your catalog thoroughly and read each description from beginning to end. There you'll find the complete story of each of these beautiful new Roses, plus all the other outstanding J&P varieties that growers all over the world have known and loved for years.

After you have gone through your catalog carefully, I suggest that you send your order in immediately because many of the newer varieties will be so much in demand.

PLANT THIS FALL — AND SAVE MONEY BY ORDERING NOW!

Why you should plant Roses this fall

FALL planting offers you many conveniences. The soil is mellow, easy to work. Prepare it any time at your convenience, and then leave it until the postman delivers your J&P plants. It is then only a matter of a few minutes to put them in the prepared ground. You can be confident of earlier, better blooms next June because the plants make new roots in the late fall and early spring . . . will produce giant blooms almost like an established plant.

PLANT EVEN WHEN GROUND IS FROZEN

You can plant Rose bushes even when the ground is beginning to freeze, as long as you protect the roots of the plants against direct exposure while they are being set out. Simply keep the roots covered so that they do not freeze while you are planting the Roses. Once in the ground, the plants will be perfectly safe.

FREE PLANTING INSTRUCTIONS WITH EVERY ORDER

Completely illustrated instructions for planting and winter protection of roses will be sent with each shipment. Also, you will be sent other helpful cultural bulletins.
